IT Business Proposal

Project : Build and maintain dedicated internal servers

GOAL

- 1. Information Security
  - Provides the best server-related security services over a private server network.
- 2. Provide enough space
  - Requires space to provide features other than client, data management and control, hosting, and cloud services for your Scalable Parallels
- 3. Minimize inconvenience between service use
  - Minimize inconvenience between service use by providing instant IT services between your Scalable Parallels and your headquarters (Twist IT) service

---

- In your case, companies that primarily focus on the marketing of start-ups or, often, review and manage client data.
- These data are easily accessible for management but must be Keep securely.
- The requirements for managing the data mentioned above can be guaranteed through the establishment of a private server.
- These services can be easily deployed in your office, and Twist IT provides access and management over the web, wherever you are.

- Immediate access to IT professionals in the event of a problem
- For built servers, they are in the headquarters.
- You can focus more on your clients' needs, and you can host all clients' data.
- Provide customers with the option to host their web pages. (This is expected to potentially generate revenue.)
- The highest level of security is guaranteed for your personal information.

Financial & Time Information

- Server initial setup: $1200 / Monthly maintenance cost: $50 (monthly)
- Cloud service: $25 (monthly)
- It will take 4 business days to build the service and order parts
- 1 day to install the service.
- In the case of maintenance, we will continue to provide it if necessary.

Current Process

- If this offer meets the requirements of your company (Scalable Parallels)
- you can sign the contract by emailing us. After writing the contract,
- the necessary parts can be purchased immediately.

Mr. John Doe / Hiring Manager

ESTsecurity. Corp

EST Building, 3 Banpo-daero, Seocho-gu, Seoul

Position : Security Solution Technical Support
Team : ECM Technical Support Team

Dear Mr.John (Hiring Manager) :

Apply for the above job areas as disclosed in ESTsecurity (Corp) on Dec 12, 2023.
I enclosed my resume, so please check it.

I think I have a high understanding and proficiency in the field your company is hiring based on my academic achievements, research experience, and various certificates and awards.

In addition, I think my history is very appropriate for the extensive IT knowledge, web development experience, and project experience required by my job.

After reviewing my personal profile and resume, I hope that you can observe my qualifications and my potential as a candidate for this role.

I am excited to further elaborate on how my specific skills and professional experiences will benefit your organization.

If you need more details about my project and history, or if you want to hear more from me, please contact me.

If you let me know your convenient date and time for the meeting, I will check the schedule and reply as soon as possible. And you have any additional questions, please don't hesitate to contact me.

The weather has gotten a lot colder. Take care of your health and I hope you always have Nice Days.

Thank you.

Yours sincerely

CHANG YEOB LEE
